

Measuring carbon footprint through Life Cycle Assessments (LCAs)

Sustainability starts with transparency. That's why we carry out LCAs on our products, to understand their impact on the environment. So you can see the carbon footprint of your product at a glance, and we can work to make future products more sustainable. Everybody wins.

Main life cycle stages (% of total kg CO2e)

EVOLVE2 40

①	Plastics	0.74kg CO2-eq	8.03%
②	Metals	0.49kg CO2-eq	5.32%
③	Electronic components	0.38kg CO2-eq	4.11%
④	Printed circuit board	1.94kg CO2-eq	21.16%
⑤	Manufacturing	1.57kg CO2-eq	17.14%
⑥	Packaging	0.04kg CO2-eq	0.41%
⑦	Transport	3.68kg CO2-eq	40.14%
⑧	Usage	0.21kg CO2-eq	2.32%
⑨	End of life	0.13kg CO2-eq	1.37%

Product carbon footprint

9.18

Bureau Veritas verified kg CO2eq

All estimates of carbon footprint are uncertain. Jabra has followed the LCA reporting rules from ISO 14067:2018. The report has been verified according to ISO 14067-3 Specification with guidance for the verification and validation of GHG statements, ISO 14065 Requirements for Validation and Verification, & ISO 14066 Competence requirements for GHG validation teams and verification teams. The scope of the LCA is 2 years of use in London (UK) reflecting the average warranty period and average use case.
